

AditSync

A powerful and easy to use link between Recorder 2002 or Recorder 6 and AditTrec

Build species master lists for the Pocket PC from subsets of existing Recorder lists

Associate maps with the sites, suitable for the Pocket PC

Download selected data (species, sites, recorders) to the Pocket PC

Undertake recording in the field

Upload sightings from the Pocket PC to your desktop PC, and import the data via AditSync database to Recorder using spreadsheet or CSV format

Importing to Recorder is very straightforward because the species, site and recorder (observer) names are identical in both systems

AditSync uses column headings that Recorder 'recognises'

Even your very first import (without a template) will be simple

Prices

AditSite Personal (inc. AditMap) £42 + VAT

AditSite Pro (inc. AditMap & AditLite) £135 + VAT

AditTrec (requires AditSite/AditSync) £25 + VAT

AditSync (for Recorder 6/2002) £19.28 + VAT

AditLink (output to DMAP/GE/KML) £29 + VAT

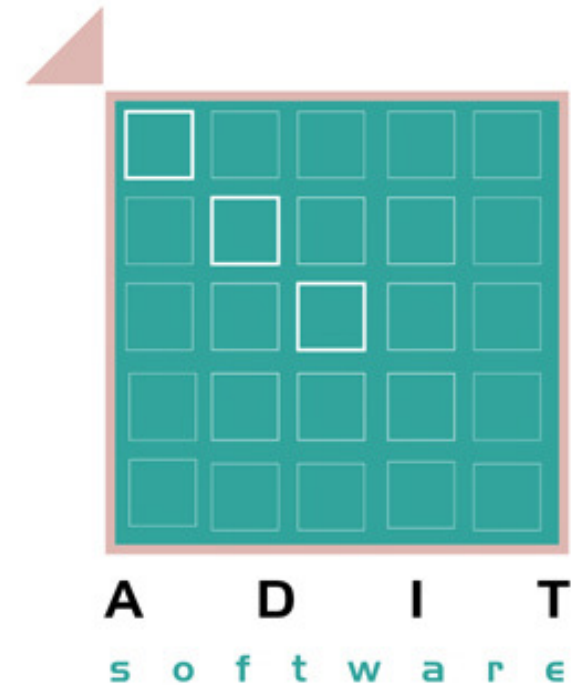

plus post and packing £2.00 + VAT per order)

AditMap

- ◆ A desktop tool for creating base maps
- ◆ Use your maps in AditSite, AditLite, AditTrec
- ◆ Turn scanned images into instant maps
- ◆ Use the trace facilities to turn images into scalable vectors for added mapping power
- ◆ Download or import geographic and vector data files to construct your maps
- ◆ Use the built-in drawing tools to complete detail — add text, symbols, symbolic fills and annotations
- ◆ Use the callable API in AditMap to plot locations, captions, symbols and data values under the control of external programs
- ◆ Use the interface in AditMap, which allows programs developed in almost any Windows-based language, to control the whole process

AditLink

- ◆ An automatic system linking various wildlife recording systems and DMAP for Windows
- ◆ Currently supports the following source databases:
 - * Recorder 2000
 - * Recorder 2002
 - * Recorder 6
 - * AditSite
 - * Levana (export file)
 - * MapMate (export file)
- ◆ Output directly to Google Earth or any other KML based mapping system

Software that works

Adit modules

AditSite

For environmental, wildlife and biological recording and mapping - simply the best

Record anything, anywhere, any way you want

Define your own extra fields, or a complete customised data entry screen

The extensive data import and export facilities ensure that you can integrate your data with everyone working in your field

AditSite Personal includes AditMap

AditSite Pro includes AditMap and AditLite

Unlimited technical support for life

There are AditSite users in England, Wales, Scotland, Ireland, Isle of Man, Alderney, Jersey, Guernsey, Spain, Belgium, Finland, France, Canada, Australia, New Zealand, Thailand and Taiwan

AditTrec

- ◆ Handheld Wildlife Recording with AditTrec
- ◆ Replace that tatty old notebook and stubby pencil
- ◆ Build a dataset on the PC
- ◆ Select species, recorders, sites, and their associated maps and build the data set
- ◆ Or choose specific maps to use on the handheld computer (maybe at a different scale or designed for a particular screen resolution) and then build the data set
- ◆ For Pocket PC's, downloaded data automatically via ActiveSync

Main data entry screen

- ◆ An interface that is simple enough for use in the field
- ◆ Sophisticated enough for all your recording purposes

- ◆ Rapid multiple species data entry
- ◆ Particularly useful for survey work
- ◆ Positioning information can come from:
 - * Built-in GPS
 - * Connected via Bluetooth
 - * Clicking on a map or manual entry
- ◆ Lat/Long is supported for use outside UK

AditForm

- ◆ AditForm is a toolkit for designing bespoke data forms
- ◆ Design your organisation's own data collection program
- ◆ Select from a wide range of data gathering options, e.g.
 - * Drop-down menus
 - * GPS
 - * Camera link
 - * Multiple choice selection
- ◆ Ideal for:
 - * Conducting surveys
 - * Questionnaires
 - * Undertaking inventories
 - * Monitoring tasks
 - * Creating quizzes or tests
- ◆ Price on application

AditLite

- ◆ A special cut-down version of AditSite for use by satellite recorders
- ◆ Customise AditLite via AditSite Pro and distribute freely to volunteer recorders
- ◆ Data can be transferred by email or FTP
- ◆ Or transfer data more traditionally via magnetic media
